Maintenance Plan for CPR/First Aid

- All new hire drivers that enter the system must be certified within a ninety (90) day period from date of hire. It is the responsibility of the transportation operators to ensure that the new hires adhere to this requirement.
- The First Aid Certificate is valid for three (3) years, at which time re-certification is required.
- If a driver changes companies within our system, he/she will be required to provide a copy of the valid Certificate to their new employer for filing.
- In addition to the CPR and First Aid training, the transportation operators' safety trainers will provide all drivers, annual refresher training for the use of an EpiPen®.
- RCJTC will perform yearly audits to ensure these requirements have been met.
